Product Name:

Circulatory assists units, peripheral compression, sequential

Special Features:

Pump, extremity sequential compression; 100 ? 240 v/ 50 - 60 hz w/ lithium ion battery backup; delivers compression to the leg, foot, or both simultaneously; continual monitoring of patient venous refill status; system detects what type of compression garment is applied to each leg; changes between leg and foot compression parameters with the touch of a button; battery automatically recharges when controller plugged into a wall outlet; integrated bed mount; integrated handle; non-detachable, hospital grade power cord; audible and visual alarms; safety system shutdown prevents battery damage; the primary functional aim of the device is to squeeze blood from the underlying deep veins, which, assuming that the valves are competent, will be displaced proximally; when the inflatable sleeves deflate, the veins will replenish with blood; the intermittent compressions of the sleeves will ensure the movement of venous blood; product device code, 16837

Shelf Life:

N/a
