Identification Code Color:

Blue

Overall Length:

3.25 inches

Unit Package Quantity:

1

Usage Design:

Treatment of pneumothorax condition

Design Designation:

Pneumothorax

Tip Type:

Sharp

Hub Type:

Luer lock

Needle Cannula Gage Designation And Location:

14 gage inner cannula

Unable To Decode:

0.80 inches

Cannula Length:

3.380 inches

Features Provided:

Sterile

Product Name:

Needle, aspiration and injection, disposable

Special Features:

Hollow, closed-end stylet; spring loaded safety tip housing a 14 gauge interior diameter catheter that is 8.6cm in length; luer lock at the cap and a color indicator showing when the safety tip retracts; designed to stay in place; key features over current pneumothorax needles include: improved success in resolving tptx and pea (pulseless electrical activity), rigid needle remains in place, no risk of cannula collapse or kinking, positive indicator of correct placement in pleural space, etched markings for depth control, reduced sharps hazard, product size: 6 inches x 0.8 inches round; product weight: 0.5 oz; shelf life: 5 years; for use in treatment of a pneumothorax condition; sterile and single use

Style Designator:

Aspirating-pneumothorax

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
