Hardness Designation:

Hard

Chemical Composition Percentage:

78.0 au, pt group; 22.0 other elements

Weight:

2.0 pennyweight per plate

Product Name:

Gold alloy casting dental fine grain hard 2 pennyweight

Special Features:

Crown and bridge; fine grain; 3.11 grams

Precious Material And Location:

gold

Precious Material And Weight:

2.271 gold grams

Precious Material:

Gold

Specification Or Standard:

lii type

Departure From Cited Document:

As modified by chemical composition

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T243-d
