Hardness Designation:

Hard

Chemical Composition Percentage:

201 brinell hardness; super micro-grain 1.0

Weight:

2.0 pennyweight per plate

Product Name:

Gold alloy casting dental hard melting range 2350-2460 degree f

Special Features:

White gold; no silver all types or porcelain-to-gold restorations; high stress; melting range 2350-2460 degree f; solder smg-3

Precious Material:

Gold and palladium

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T243-d
