Physical Form:

Paste

Workable Consistency Temperature Rating:

Between 58.0 degrees fahrenheit and 86.0 degrees fahrenheit

Product Name:

Impression material dental paste workable at 58-86 degrees f 1.6lb

Special Features:

Polymerization vinyl polysiloxane; multiple viscosity; light bodied; medium - heavy bodied; consists of sufficient quantity of base and catalyst to yield a mix volume of 1.6 lb; with disposable mixing pads; for use in impressing oral structures; note: g

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T243-d
