Major Components:

Headrest, adjustable; armrest, adjustable

Design Type:

Motor driven pedestal

Motor Current Type:

Ac

Motor Voltage In Volts:

110.0

Motor Frequency Rating:

60.0 hertz

Motor Phase:

Single

Upholstered Component Name:

Headrest; arms; back; seat

Upholstery Material:

Plastic foam

Upholstery Color:

Any acceptable

Product Name:

6200 examination and treatment chair

Special Features:

Power hydraulic base; manual articulating top; dual side operation; upholstery hand sown; high density foam; comes in 14 colors; base available in beige or silver smoke; all materials are fire retardant; armrest with release mechanism; adjustable headrest; dual rotation locks allow 330 degree chair movement; 8 x 13 inch hinged foot rest; two base heights, 21 1/2 inch lowered and 33 inch raised or 19 inch lowered and 30 inch raised

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T243-k
