Product Name:

Profiler 0.04 taper hand instruments 21mm assort 15-40

Special Features:

Profiler, 0.04 taper hand instruments, 21mm assorted 15-40; nickel titanium hand files can be used interchangeably with the rotary files, as finishing files or to shape the entire canal faster and with more control than traditional hand file methods. Their unique design lets users create a continuous taper and they work especially well in small curved root canals. These nickel titanium hand instruments offer the same super strength and flexibility as the rotary instruments. Feature radial-landed u-shaped flutes that lift debris coronally. Noncutting tips that reduce perfring, ledging and transporting greater tapered flutes which reduce the number of instruments needed
