Physical Form:

Cord

Size Designator:

000

Product Name:

Cord ultrapak size 000

Special Features:

Bottle ultrapak, size no. 000; can be used for: anterior teeth, double packing, and substitute for black silk suture as lower cord in the two-cord technique; material: 100 pct. Cotton, knitted into thousands of tiny loops which form long, interlocking chains; knitted design exerts gentle, continuous outward force following placement as knitted loops seek to open; designed to enhance the viscostat/astringent and dento-infusor tissue management technique; conventional techniques using alum, aluminum chloride, etc. Are also enhanced when using ultrapak plain knitted cords, since they carry significantly greater quantities of hemostatic solution than conventional cords

Material:

Cotton

Material:

Cotton

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T243-e
