Cord
Size Designator:
000
Product Name:
Cord ultrapak size 000
Special Features:
Bottle ultrapak, size no. 000; can be used for: anterior teeth, double packing, and substitute for black silk suture as lower cord in the
two-cord technique; material: 100 pct. Cotton, knitted into thousands of tiny loops which form long, interlocking chains; knitted design
exerts gentle, continuous outward force following placement as knitted loops seek to open; designed to enhance the viscostat/astringedent
and dento-infusor tissue management technique; conventional techniques using alum, aluminum chloride, etc. Are also enhanced when
using ultrapak plain knitted cords, since they carry significantly greater quantities of hemostatic solution than conventional cords
Material:
Cotton
Material:
Cotton
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
T243-e
