7.000 feet
Size Designator:
00
Product Name:
Cord ultrapak sz 00 7.5 ft. Long
Special Features:
Bottle, 7.5 ft long; ultrapak size 00; can be used for: preparing and cementing veneers restorative procedures dealing with thin, friable
tissues. The ultrapak cord is made of 100% cotton, knitted into thousands of tiny loops that form long, interlocking chains; the unique
knitted design exerts a gentle, continuous outward force following placement as the knitted loops seek to open. Ultrapak cord is designed to
enhance the viscostat/astringedent and dento-infusor tissue management technique; however, conventional techniques using alum,
aluminum chloride, etc., are also enhanced when using ultrapak plain knitted cords, since they carry significantly greater quantities of
hemostatic solution than conventional cords
Material:
Cotton
Material:
Cotton
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
T243-e
