Special Features:

The buchanan system b pluggers have revolutionized warm gutta percha techniques; these high-quality pluggers have a shape that closely matches the final root canal preparation, maximizes condensation forces on the softened gutta percha without placing undue stress on the root canal system; provides an exact temperature throughout the procedure, the buchanan pluggers do not over-soften the gutta percha and the warm mass fills lateral canals as easy as it seals apically; the pluggers cool almost instantly and separate easily from the condensed gutta percha when you disengage the heat

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
