Width:

18.0 centimeters

Length:

24.0 centimeters

Base Material:

Plastic, polyester

Base Color:

Blue

Emulsion Sensitivity:

Green

Film Exposure Quantity:

1

Contrast Rating:

Very high

Base Material Thickness:

0.007 inches

Granule Size:

Fine

Sensitized Coating Location:

One side

Corner Cut Type:

Round

Product Name:

Film radiographic om-1 24x18cm orthochromatic not interleaved100

Film Processing Type:

Om-1

Special Features:

Orthochromatic; high speed; not interleaved; used for mammographic procedures and extremity radiography, particularly for magnification studies and where grids are used

Precious Material:

Silver

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T140-b
