Design Type:

Mobile or portable

Control Type:

Mobile

Electric Power Rating:

4500.0 watts

Product Name:

X-ray apparatus: low capacity port

Voltage In Volts:

120.0 and 230.0

Phase:

Single

Special Features:

50 ma, 90 kvp; wheels; in reusable container; can be unpacked, assembled, made operational in 10 mins by one trained individual; assembly tools provided; requires 75 in. Ceiling height; 32 degrees to 100 degrees f w/not more than 95% relative humidity; control unit w/cord; for use in small med units outside fld ty hosps to determine nature and extent of injuries; used to meet bedside radiography requirements; for use in fld assemblies only

Frequency In Hertz:

50.0 or 60.0

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T140-c
