Overall Height:

710.0 millimeters

Current Type:

Ac

Voltage Rating:

Between 100.0 volts and 230.0 volts

Operation Method:

Automatic

Special Features:

Fan beam technology; self-calibrating; a large crosshair laser; easy on/off table and positioning aids; switched-pulse, dual-energy x-ray system; multi-element detector array; 195 x 66 cm scanning region; scanning sites: pa lumbar spine, proximal femur (hip), forearm and whole body; scan time/exposure: lumbar spine - 15s/5mr, hip - 15s/5mr, forearm - 30s/10mr, and whole body 6min/1.5mr

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T150-d
