**Overall Height:**

710.0 millimeters

**Current Type:**

Ac

**Voltage Rating:**

Between 100.0 volts and 230.0 volts

**Operation Method:**

Automatic

**Special Features:**

Modular design; programmable scanner arm w/large crosshair laser and positioning aids; self-calibrating; fan beam technology; switched-pulse, dual-energy x-ray system; 96 x 51 cm scan region; scanning sites: pa lumbar spine, proximal femur (hip), forearm; scan time/exposure: lumbar spine - 15s/5mr, hip - 15s/5mr and forearm 30s/10mr

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

T150-d
