Product Name:

X-ray apparatus radiographic and fluoroscopic:

Special Features:

X-ray apparatus, radiographic and fluoroscopic, medical field, suitable for use in fixed and field military medical treatment facilities; operational on an ac 3 phase power source limited to output of 60 kva; input voltage is 208/120 vac; 3 phase "y" connection, 50/60 hz; does not require better than 10% line voltage regulation when operated at maximum line current settings; sized to accommodate 2 awg conductors; cots; consists of the following components: high voltage generator and interconnecting cables/wiring; operator control; tilting table with integral table mounted image receptor; tubestand to support overtable tube assembly; over table x-ray tubehead and collimator; closed circuit tv chain w/monitors and image storage features; capable of free standing installation into a 2: 1 iso shelter or fixed facility

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T140-c
