Width:

24.000 centimeters

Length:

30.000 centimeters

Corner Cut Type:

Any acceptable

Product Name:

Film radiographic 30cm x 24mm 100 sh

Special Features:

Mammography film that delivers both contrast to view dense breast parenchymal tissue and exposure latitude to see peripheral breast; also breast margins, subcutaneous tissue, anatomical landmarks; dual emulsion film performs just like single emulsion film; sensitive to green light; process in standard cycle for higher productivity; demonstrates good drying characteristics and stable processing; store unopened boxes of film in cool, dry place shielded from x-rays and other penetrating radiation; use kodak gbx-2 safelight filter; process with kodak rp x-omat chemicals for best results

Supplementary Features:

Kodak min-r I film

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T140-b
