Product Name:

Multiloader cassette kodak 300 plus

Special Features:

Footprint of 34 x 33 in., auto start up and shutdown, always ready for operation; roller jog feature helps keep rollers wet and clean, preventing artifacts on films; cool down mode prevents condensation from building up inside the equipment when the system is shut down; static eliminator at the dryer exit supports better film stacking and helps prevent film jams; developer rack design which reduces the potential for film artifacts; uses kodak x-omatic or min-r 2 cassettes; rapid access processor which offers 4 processing cycles; produces a dry, ready to read 35 x 43 cm radiograph just 80 seconds after the cassette has been loaded into the multiloader
