Width:

24.000 centimeters

Length:

30.000 centimeters

Film Exposure Quantity:

1

Sensitized Coating Location:

Both sides

Corner Cut Type:

Any acceptable

Product Name:

Film radiographic xar-5 sensitized both sides 30cm lg 24cm w 50s

Film Processing Type:

Xar-5

Special Features:

An autoradiography film for use with all commonly used isotopes and chemiluminescence labels; coated on both sides of a clear base with emulsion and is suitable for both direct autoradiography and exposures made with intensifying screens, including biomax intensifying screens; suitable for manual and automated processing; 50 sheets

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T140-b
