Overall Length:

15.990 inches

Overall Height:

53.430 inches

Overall Width:

23.400 inches

Current Type:

Ac

Frequency Rating:

Between 50.0 hertz and 60.0 hertz

Film Accommodation Type:

Cut sheet

Film Size Accommodated:

11 inch x 14 inch or 14 inch x 17"

Product Name:

Processing machine radiographic film automatic ac 120 and 240v

Voltage In Volts:

120.0 and 240.0

Special Features:

Drystar 3000 thermal printer, large format dry imager for grayscale imaging.

Supplementary Features:

Throughput 14" x 17" 50 sheets/per hour 1st film approx. 120 seconds; 11" x 14" 70 sheets/per hour 1st film approx. 90 seconds. Capacity of supply tray 100 sheets; capacity of pick-up tray 50 sheets.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T150-c
