Overall Length:

11.980 inches

Overall Height:

6.980 inches

Overall Width:

16.680 inches

Product Name:

Ultrasound pocket imaging device

Special Features:

Pocket ultrasound system; includes: docking station (1), li ion battery packs (2), secure digital sd memory card (1), acuson 10 viewer software and instructions for use cd (1), doppler-size ultrasound gel, localized power cord, usb cable, and one year factory warranty; dedicated 2-4 mhz phased array transducer for 2 d-mode imaging in fundamental and harmonic imaging modes; application presets; tissue grayscale optimization technology; intuitive pda-style user interface; distance, perimeter, and area measurements to quickly evaluate metrics which guide clinical descisions; secure digital (sd) memory slot for flexible, scalable storage of still frame and cine image data; usb port for transport of patient information, system diagnostic information, and future system firmware upgrades; 3.7 in lcd display; docking station w/ dual bay battery charger fully charges batteries in approx. 2.5 hrs

Supplementary Features:

Hardware specifications: single unit with integrated transducer, display, and control panel. Handheld; height 54mm (2.1 in), width 97 mm (3.8 in), length 142 mm (5.6 in). Transducer: length 137 mm (5.38 in); width 47.8 mm (1.88 in); height 31.8 mm (1.25 in). Docking station: weight 953 kg (2.1 lbs); length 279 mm (11.0 in); width 279 mm (11.0 in); height 92.2 mm (3.63 in).

Shelf Life:

N/a
