Design Type:

Portable

Tube Quantity:

1

Err Default:

Err default

Product Name:

X ray apparatus portable radiographic medical

Voltage In Volts:

115.0 and 230.0

Special Features:

Exposure time: 0.01 to 4.0 seconds; x-ray tube: stationary anode, 15 degrees target, 1.0 fs 30, 000 heat unit storage; generator type: high frequency resonant inverter, microprocessor controlled; cassette storage: seven cassette capacity (14 x 17); system dimensions: operation mode 26 in w x 42 in l x 53 in h, storage mode 26 in w x 53 in l x 28 in h; wheels: 16 in inflatable heavy duty casters

Frequency In Hertz:

50.0 or 60.0

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T140-c
