Product Name:

X-ray apparatus portable digital radiography

Special Features:

The x-ray apparatus portable digital radiography (xrapdr) system combines two capabilities on a manually driven wheeled platform that transports an x-ray generator, x-ray tube and tube stand, collimator, image display and a flat-panel detector; this mobile radiographic unit utilizes one of several types of digital imaging; advantages of digital imaging over film include greater dynamic range, reduced patient radiation exposure, and has the ability to integrate digital picture archiving and communication systems (pacs)

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
