Product Name:

Therapy unit pulsed electromagnetic 117v 60hz ac 5 amps

Exterior Container Weight:

150.0000 pounds

Unit Of Issue Cube:

10.0000 cubic feet

General Description:

Diapulse unit is a non-thermal, high peak power, high frequency short wave, electromagnetic energy device; input power 117 vac, 60 hz, 5 amps; frequency 27.12 mhz; pulsed power output 293 to 975 watts (max) in six steps; pulse duration 65 microseconds; 80 to 600 pulses per second in six steps; fail safe circuit protection; hybrid design; 21.5 in. Wide by 19 in. Deep by 44 in. High; built-in digital compliance meter; built-in pulse frequency meter; push-button controlled; variable tuning treatment head; flexible arm extension height 6'6"/extension length 3'7"; single console heavy gauge aluminum on casters; diapulse calibration meter included; accelerates tissue healing

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
