Overall Length:

18.000 inches

Overall Height:

21.000 inches

Overall Width:

18.000 inches

Current Type:

Ac or dc

Furnished Items And Quantity:

Operators, 2; service manuals, 2

Portability:

Portable

Product Name:

Ventilator volume ptbl:

Special Features:

The unit is a transport ventilator for air and ground movement of patients. It is a self-contained system capable of supplying 21% to 100% oxygen when provided 50 psi oxygen source. The breathing circuit uses standard disposable universal 22 mm tubing set. Function modes: assist/control; intermittent mandatory ventilation (imv); continuous positive airway pressure (cpap); and positive end expiratory pressure (peep). Alarms: apnea, high pressure, low pressure (disconnect), external power (low/fail), battery (low/fail), low gas source pressure, low peep and low exhale volume. Visual: breaths per min., peak inspiratory pressure (pip), mean airway pressure (map), peep, exhale volume, spontaneous patient rate, and alarm status. The unit allows ventilation of both children (1-12 years) and adults. Electrical: 115/230 vac, 50/60/400 hz, 11-30 vdc; joint air certification for fixed & rotary wing aircraft for combined essential characteristics

Special Test Features:

Jet aircraft random vibraton testing

Supplementary Features:

UNIT-SH-ALL-BECO

Test Data Document:

96906-1472 standard (includes industry or association standards, individual manufactureer standards, etc.). And 80204-es1-1999 standard (includes industry or association standards, individual manufactureer standards, etc.).

Shelf Life:

N/a

Unit Of Measure:
