Product Name:

Pad operating table

Special Features:

Latex-free gel-like pad; three-quarter medium length; 45 in. Long by 20 in. Wide; 10mm thick; provides protection over the surface of the operating table; used for lithotomy positioning or used as full-length pad for pediatric patients; acts as an extra fatty soft tissue layer between patient and table to reduce risk of tissue trauma in long surgical procedures; may be rolled up and used as patient positioners

Shelf Life:
