Product Name:

ELEV-AT-ION-GRID

Special Features:

9size: 3 inch wide by 8 inch long; frids are 3.75in. High to prevent patients from standing in contaminated run-off; flow-through design with removable feet on bottom allows for a 3/4in. Clearance that prevents water from building up along sides of grids; structural black foam polyethylene (high-density plastic) construction resists oils, grease, and chemical corrosion; slip-resistant surface for patient safety; rectangular openings on top of grids are small enough for canes and walkers to move across
