Product Name:

Cap safety pro one series reversible fits 30-60 dram

Special Features:

Plastic, reversible cap fits 30-60 dram, the dual imprint concept (our "red light/green light" system) that alerts every customer when the cap has been reversed. This prevents any user from inadvertently reversing the cap without seeing a bold red imprinted warning that the cap is no longer child resistant, increasing the safety of this product and enhancing protection for both you and your customers. Threaded non-c/r mechanism keeps cap in place in pockets and purses - unlike snap caps, costs less than traditional, two cap systems

Shelf Life:
