**Mounting Type:**

Floor

**Overall Length:**

77.000 inches

**Overall Width:**

29.000 inches

**End Application:**

Digital exercise testing systems

**Voltage Rating:**

Between 200.0 volts and 240.0 volts

**Unit Type:**

Electric

**Power Source:**

Cord

**Motor Current Type:**

Ac

**Features Provided:**

Adjustable

**Product Name:**

Treadmill

**Special Features:**

0-25 percent grade continuously variable; belt speed 0mph start-up; 0 to 13.5 mph speed range; handrails front and side; max rated load 450 lbs; 3hp driver motore; self-calibrating for speed/grade; digital control; interface capabilities

**Frequency In Hertz:**

60.0 and 50.0

**Supplementary Features:**

Single-phase, 20 amp, nema 6-20 r wall socket-dedicated circuit recommended; 2 stopping modes; 60-inch walking surface; interfaces with exercise testing systems and cardiac assessment systems for exercise

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T265-h
