End Application:

Drainage unit, pleural cavity

Capacity:

600.0 milliliters

Product Name:

Bag blood recovery atrium ats in-line capaci type 600ml package of 6.

Special Features:

Compact postoperative ats collection device for use with chest drains and locking auto-connect in-line tubing conector. Provides rapid conversion from collection mode to reinfusion mode. Provides easy positioning directly to front face of the chest drain or adjacent bed rail. Bag deflects slightly under vacuum and is calibrated on one side for vacuum pressure and opposit side for non-vacuum conditions. Fluid level calibrations are in 25ml increments, up to collection volume of 600ml. Used for n0n-pressure and pressure infuser application with in-line bag infuser pressure of 150mmhg.
