Overall Length:

30.00 inches

Overall Height:

24.50 inches

Overall Width:

23.75 inches

Current Type:

Ac

End Application:

6530-01-641-4641; sterilizer, surgical instrument and dress

Product Name:

Water recovery system (wrs), sterilizer surgical instrument and dressing

Voltage In Volts:

115.0

Special Features:

The water recovery system (wrs) reclaims and condensate from the sterilizer main unit for reuse; a circulation pump and heat exchanger allow for hot steam to be cooled and condensed into water; a water eductor creates a vacuum during the preconditioning phases to remove air and also provides a deep vacuum to assist drying a load during the dry phase; the wrs also provides an easy push button method to refill the smu jacket; for use with e.l. 6530-01-641-4641, sterilizer surgical instrument and dressing; dimensions: 30in x 23.75in; water capacity: 6 gallons; weight-dry: 170 pounds; electrical: 115 vac, 1 phase federal from smu

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
