Product Name:

Heat transfer solution plastic lens dyeing ophthalmic

Unit Of Issue Cube:

0.0625 cubic feet

General Description:

Designed to maintain high specific heating with close temperature tolerances during the dye operation; protect the heating element from burnout and aids in preserving the base interior when placed in dye unit base; one quart; for use in prototype ua b203 and current ua 3005, nsn 6545-00-292-9696 optical fabrication unit, field, no. 2

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
