End Application:

6545-01-603-7352 kit, transport

Product Name:

Module transport 3/4 (t3/4) coyote

Special Features:

Transport module t3-transportation advanced airway/fluid management (aam) module; man packable; can be transported by one operator; integrates latest technologies to provide casualty mechanical ventilation with oxygen generation up to 3 lpm at 93 percent concentrations; also provides for advanced airway management capabilities with an emergency cricothyrotomy kit and a rapid intubation system that, when used with the glide scope ranger, increases the probability of a first-time intubation; transport module t4-transportation advanced airway/fluid management (aam) module is man packable; can be transported by one operator; is combined with the t3 module; incorporates all the elements needed for advanced fluid management; stores and transports 4 standard blood storage bags up 72 hours; warms blood for casualty transfusions; provides controlled casualty fluid resuscitation administered intravenously; monitors casualty bodily fluid input and output

Supplementary Features:

Component of casevac set, transport kit; coyote

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
