Tube Length:

200.0 millimeters

Tube Material:

Plastic, polypropylene

Product Name:

Bacteriological specimen collection and transportation sys 100s

Special Features:

Sterile; disposable; crushable glass ampule or chamber containing 48 hr transport media; top id 7.937 mm ; cap securing flange not included; cap material plastic; cap type friction; cap tab not included; socket q type 1; applicator q type 1; applicator material plastic or wood; tip material cotton, rayon, or polyester fiber; cotton or polyester separator plug

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T397-f
