Usage Design:

Quantitation of fibrinogen concentration in plasma

Test Capability Quantity:

50

Protective Storage Feature:

Requires refrigeration between 2 degrees to 8 degrees c

Product Name:

Test kit fibrinogen determination sufficient for 50 tests

Component Breakdown Within Each Test Kit:

Bovine thrombin reagent; assayed fibrinogen calibration reference; owens veronal buffer

Exterior Container Weight:

11.00 pounds

Exterior Container Cubic Measure:

0.509 cubic feet

Exterior Container Quantity:

12

Unit Of Issue Cube:

0.0424 cubic feet

Supplementary Features:

D-day item for dod

Unit Of Issue Weight:

0.9167 pounds

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A510v0
