Usage Design:

To determine total and direct bilirubin

Test Capability Quantity:

200

Product Name:

Test kit bilirubin determination 200 tests

Component Breakdown Within Each Test Kit:

Contains caffeine reagent; fehling reagent; 0.5 hydrochloride acid; sodium nitrite solution; stabilizer and sulfanilic acid reagent

Supplementary Features:

Medsep item for dod, integrated clinical systems inc

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A510v0
