Product Name:

Test kit fibrin/fibrinogen degradation products determination20s

Component Breakdown Within Each Test Kit:

2 ml collection tube 20; 25 ml bt glycine saline buffer 2; 1 ml human negative control serum 1; 1 ml human positive control serum 1; disposable mixing rod 20; pipette 20; 2.5 ml polystyrene latex suspension 1; rubber bulb 1; glass test slide 1

Exterior Container Quantity:

1

Special Features:

Sufficient quantity to perform 20 semi-quantitative determinations of fibrin/fibrinogen degradation products in serum or urine using the latex agglutination slide test method

Supplementary Features:

Notes: f, g

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A510v0
