Usage Design:

Immunoassays of theophylline

Test Capability Quantity:

100

Test Media:

Plasma or serum

Component Breakdown Within Each Test Kit:

Consists of theophylline antibody/substrate reagent, theophylline enzyme reagent, calibrators, concentrated buffer solution, and graph paper

Supplementary Features:

Medsep item for dod, syva co

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A510v0
