Coagulation Factor Deficient Plasma - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/6550-01-245-9041

Physical Form:
Powder
Primary Container Type:
Vial
Special Features:
Deficient in factor ix and provides all other coagulation factors within the normal range; for reconstitution w/1 ml distilled water; used in
factor ix assays; 1 ml after reconstitution
Supplementary Features:
Note: f, g
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A10000
