**Usage Design:**

Tests for the performance of theophylline levels

**Test Capability Quantity:**

12

**Protective Storage Feature:**

Requires refrigeration between 2 degrees to 8 degrees c

**Product Name:**

Test kit theophylline determination 12 tests

**Test Media:**

Blood

**Component Breakdown Within Each Test Kit:**

Using one drop of whole blood produces results without the use of any instruments; consists of sufficient reagents, pipets, and capillary tubes

**Exterior Container Weight:**

9.00 pounds

**Exterior Container Cubic Measure:**

1.81 cubic feet

**Exterior Container Quantity:**

1

**Unit Of Issue Cube:**

1.81 cubic feet

**Unit Of Issue Weight:**

9.00 pounds

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A510v0
