Usage Design:

Tests for the performance of theophylline levels

Test Capability Quantity:

12

Protective Storage Feature:

Requires refrigeration between 2 degrees to 8 degrees c

Product Name:

Test kit theophylline determination 12 tests

Test Media:

Blood

Component Breakdown Within Each Test Kit:

Using one drop of whole blood produces results without the use of any instruments; consists of sufficient reagents, pipets, and capillary tubes

Exterior Container Weight:

9.00 pounds

Exterior Container Cubic Measure:

1.81 cubic feet

Exterior Container Quantity:

1

Unit Of Issue Cube:

1.81 cubic feet

Unit Of Issue Weight:

9.00 pounds

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A510v0
