Usage Design:

Hepatitis b antibody detection

Test Capability Quantity:

100

Protective Storage Feature:

Requires refrigeration between 2 degrees to 8 degrees c

Product Name:

Test kit hepatitis b antibody detection 114 components 100 tests

Component Breakdown Within Each Test Kit:

K100 monoclonal mouse beads; one 5 ml vial peroxidase monoclonal mouse conjugate; one 6 ml vial positive control human hbsag; one 9 ml vial negative control; 1 bottle 10 opd tablets; one 55 ml bt diluent for opd

Supplementary Features:

Medsep item for dod, abbott labs

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A510v0
