Physical Form:

Powder

Usage Design:

For the quantitative determination of creatine kinase

Primary Container Type:

Vial

Primary Container Content Quantity:

16.000 milliliters

Total Primary Container Quantity:

20

Product Name:

Creatine kinase test reagent powder for 2000 tests 20s

Special Features:

Sufficient qty to perform 2000 tests; for use with il monarch chemistry system

Supplementary Features:

Medsep item for dod, instrumentation laboratory

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A10000
