**Physical Form:**

Powder

**Usage Design:**

For the quantitative determination of creatine kinase

**Primary Container Type:**

Vial

**Primary Container Content Quantity:**

16.000 milliliters

**Total Primary Container Quantity:**

20

**Product Name:**

Creatine kinase test reagent powder for 2000 tests 20s

**Special Features:**

Sufficient qty to perform 2000 tests; for use with il monarch chemistry system

**Supplementary Features:**

Medsep item for dod, instrumentation laboratory

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A10000
