Usage Design:

For creatine kinase determination

Product Name:

Test kit creatine kinase determination 120 tests

Component Breakdown Within Each Test Kit:

Eight 1 ml vial conjugate; ten 2 ml vial substrate; six 10 ml vial calibrator; one 32 ml bt calibrator diluent; 120 reagent tabs

Special Features:

Alyophilized; impregnated w/creatine kinase antibodies; sufficient quantity to perform 120 tests; testing is done on stratus 1 or stratus 2; medsep item for dod; baxter healthcare corp. Dade div

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A510v0
