Usage Design:

For use on stratus 1 or stratus 2

Test Capability Quantity:

120

Product Name:

Test kit theophylline determination 129 components 120 tests

Component Breakdown Within Each Test Kit:

1 eight ml vial conjugate; 2 ten ml vials substrate; 6 five ml vials calibrator; 120 reagent tabs

Special Features:

Impregnated w/theophylline antibodies

Supplementary Features:

Medsep item for dod, baxter healthcare corp. Dade div.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A510v0
