Usage Design:

For detection of hepatitis a virus in human; for use w/imx analyzer

Test Capability Quantity:

100

Protective Storage Feature:

Expiration dated and requires refrigeration between 2 degrees to 8 degrees c

Product Name:

Test kit hepatitis a igm antibody detection

Component Breakdown Within Each Test Kit:

One test reagent pack (4.9ml bt mode 1 calibrator; 100 reaction cells) ajjw

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A510v0
