Usage Design:

W/quantum analyzer

Test Capability Quantity:

100

Component Breakdown Within Each Test Kit:

100 antigen coated beads, three 1ml vials conjugate concentrate, three 19ml vials conjugate diluent, one 2ml vial positive control, one 2ml vial negative control, two 20ml vials specimen diluent, 1 bt (10 tablets) opd, one 55ml bt opd diluent, one 125ml bt normal sulfuric acid, 100 tubes and 100 trays

Special Features:

Medsep item for dod, abbot diagnostics

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
