**Usage Design:**

W/quantum analyzer

**Test Capability Quantity:**

100

**Component Breakdown Within Each Test Kit:**

100 antigen coated beads, three 1ml vials conjugate concentrate, three 19ml vials conjugate diluent, one 2ml vial positive control, one 2ml vial negative control, two 20ml vials specimen diluent, 1 bt (10 tablets) opd, one 55ml bt opd diluent, one 125ml bt normal sulfuric acid, 100 tubes and 100 trays

**Special Features:**

Medsep item for dod, abbot diagnostics

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A510v0
