Physical Form:

Liquid

Usage Design:

Used for calibration and control for normal quantitative determination in blood

Primary Container Type:

Vial

Primary Container Content Quantity:

2.000 milliliters

Total Primary Container Quantity:

8

Product Name:

Reference standard blood chemistry 2ml vial 8 vials per package

Special Features:

Normal level

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A10000
